Update Summary For CVTDBF V2 R7 M21

Overview

The section provides information on the CVTDBF update for the current release.

CVT0010 - Field # not found in file.

If a field is specified in the **FLD** parameter that is not in the **FROM FILE** parameter, error message CVT0010 is sent.

CVT9998 - No records converted from file FILE in LIBRARY. File empty.

If the CVTDBFXLS command encounters an empty **FROM FILE**, error message CVT9998 is sent.

Incorrectly placing "We#" instead of "Wed"

When using the "d" date format code the command incorrectly inserted "We#" instead of "Wed" (Wednesday).

Not placing correct number of custome headings

Ex. If column A contains 3 levels of custome headings and column B contains 2 levels of custome headings only 2 columns of custome headings were created.

Removed built in Print_Title Excel name.

The print title area was named Print_Title, a name reserved in Excel 2007.
